Overview

My core area of research is reinforcement learning with focus on sample complexity analyses. Broadly, I'm interested in developing methods with provable guarantees for sequential decision making frameworks like reinforcement learning, (contextual) bandits and general online learning.

Data-dependent Importance weighted Active Learning
Advisors: Ambuj Tewari and Barzan Mozafari

Studied the sample complexity of importance-weighted active learning (IWAL) algorithms based on data-dependent complexity measures for bounded loss functions.
